

gp-lomb productions The Ultimate Halloween Haunted House

e-mail: gp-lomb-productions@gp-lomb.com

Welcome to gp-lomb productions Ultimate Halloween Haunted House - 2006. This is my third interactive-desktop Halloween special and I think the most fun. License for one copy is \$9.99, but gp-lomb productions reserves the right to change prices at any time. You do not have to buy it to play it, but I may remove it from the web after the holiday to make room for other such things. Plans are already in the making for Christmas and possibly Hanukkah.

You can play the Ultimate Halloween Haunted House on your computer for free. No charge. Just click on the picture of the haunted house and click away at those mischievous pumpkins. Each pumpkin plays its own little share of mischief around the haunted house. And, if you knock on the door to the haunted house (hover your mouse and click over the door knocker), you can witness what is inside the haunted house.

If you decide you like the Ultimate Halloween Haunted House, and you would like to download a copy, click on the PayPal button below the Ultimate Halloween Haunted House ("Add To Cart"). PayPal accepts most major credit cards. Once payment has been made, I will e-mail you the "password" to allow you to extract the .zipped files to your desktop or cd. This "read me" file will be included in the .zip file in .txt and .pdf formats.

The Ultimate Halloween Haunted House is made to run directly from your hard drive from one master folder. This was set up this way so you can easily delete the Ultimate Halloween Haunted House from your hard drive (as the entire program can be contained in one folder) by merely deleting that one folder; that is if you ever want to delete it; or if you want, you can cut and copy the one folder to move it to another drive. The Ultimate Halloween Haunted House can also be burned to a cd. Burning to a cd can save precious hard-drive space.

INSTRUCTIONS TO DOWNLOAD and SAVE TO HARD DRIVE and or BURN TO CD:

Click on the large pumpkin located to the left of the Pay Pal buttons and Windows should present you with a download-message box. Click on the option to save the file and save it to a place on your hard drive where you will remember to find it. The file will be downloaded as one .zip file. You can use WinZip to unzip the file and extract the folder with its sub folders and files to a place on your computer of your choosing. WinZip will ask for a password to extract the files. **TO AVOID FRUSTRATION, PLEASE MAKE SURE YOU HAVE OBTAINED A PASSWORD FROM ME BEFORE UNZIPPING THE FILE!** Once I have received notice from PayPal of your purchase, I will e-mail you a password to the e-mail provided [PayPal](#).

Extract the files (using WinZip) to a place on your hard drive where you want the program to permanently reside, or if you intend to burn it to a cd instead, extract the files to a temporary folder where your burn cd-burning program can easily find it. There are a lot of cd-burning programs out there, but my choice is Ahead Software's Nero Burning Rom.

IF FILES ARE EXTRACTED TO YOUR HARD DRIVE:

Look for the file named "Autorun.exe" which is found within the main folder labeled "halloween2006." Click on the Autorun.exe file and a "run program" will play on your desktop with five pumpkins thereon. The four pumpkins on the bottom row, from left-to-right, are buttons that do the following: read-me (contains link to these instructions); run screamer (runs the program); install wall-paper (installs a background picture of the Ultimate Halloween Haunted House on your desktop - which can be easily removed within Windows like any other background picture); and web-site (which links to my website). That is all there is to it!

IF FILES ARE TO BE BURNED TO A CD:

Using cd-burning software of your choice, copy THE CONTENTS ONLY of the main folder "halloween2006" in to your cd-burning software per the vendor's instructions and burn it to a cd. DO NOT COPY the main folder "halloween2006." The reason I am stressing this is because the "Autorun.exe" file, found within the main folder "halloween2006," needs to be at the first level on the cd in order for the cd to autorun upon being placed in your cd/dvd drive. The "Autorun.exe" file is situated relative to other files in order to work properly, so I advise against moving any of the files or folders around; leave them as they are and where they are.

IF for some reason your computer and or cd/dvd player will not autoplay cds, you can always click directly on the "Autorun.exe" file to run the program.

SYSTEM REQUIREMENTS:

I have only tested Ultimate Halloween Haunted House on computers with a cpu speed of over 2ghz using Windows XP Professional and Home Editions. When tested on other operating systems such as Windows 98 2nd, Windows ME and Windows 2000, success or failure will be posted here.

The Ultimate Halloween Haunted House is meant to run on Windows' systems only, not Macintosh or Linux.

Macromedia/Adobe FLASH is necessary to run this program. It is my understanding Internet Explore comes with Flash, so this should not be a problem; do not quote me on this however. That being said, Flash, to my knowledge, is a free download which can be obtained from the <http://www.adobe.com> website if for some reason it is not already on your system. I believe Flash 9 is the current version of Flash at this writing, although this program was developed with Flash 8 and should work with earlier versions of Flash as well.

ENJOY! gpl
